

Video MultiPortal Solution by VoipSwitch

Powerful and cost-effective platform for businesses interested in benefiting from the current VOD/IPTV consumer trends.

Ready to become a top player in the OTT video entertainment revolution?

Voipswitch Video MultiPortal is a complete solution enabling companies such as telecoms and Internet providers to extend their offering by Video on Demand and IPTV in the over-the-top model (OTT, content distributed directly through Internet).

The solution consists of:

- **Streaming server** supporting Apple http live streaming, Flash streaming, RTSP and Silverlight. Trick play enabled (play/pause, rewind, forward, seek).
- **Advanced billing system** - full control with little effort.
- **Web interface** for administration and managing content.
- **Web Portal** with content catalog allowing end users to browse, preview and order movies on their PC or smartphone.
- **Sign up component** working with several payment systems (PayPal, CyberSource etc.)
- **High Quality** using h.264 AVC and AAC for remarkable High-Definition experience on-the-go and on the home cinema.
- **Transcoding module** automatically converting the source material to the formats required for each phone or player.
- **Content protection** to ensure full security (AES encryption).

Multiscreen

Stream your content to smartphones, tablets, PCs, STBs or Roku players

Supported mobile handsets: iPhone/iPad, Android phones and tablets, Blackberry handsets, Blackberry tablets

How does it work?

- The Web Portal allows you to offer free or paid content to registered subscribers.
- Your customers/subscribers can browse the content catalogue on their PC or smartphone, order movies and watch them instantly from various devices.
- The movies can be purchased separately or be arranged in packages, for example at fixed monthly price for several movies.

Distributing your own exclusive content

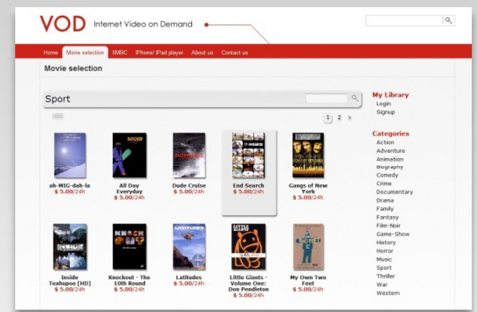

Besides the commercial use, Video MultiPortal Solution is perfect for non-media companies like **learning centers, universities and corporations** interested in offering their training courses and other materials only to a limited group of subscribers. Distributed exclusive content is safe thanks to implemented content protection mechanisms.

We provide branding and customization for all the platform components, making your Video MultiPortal a ready-to-go business solution.
